VOLUME 43 · SUBJECT INDEX

Abbreviations:—"(L)" refers to letters to the Editor

Abu Dhabi, complete and partial hydatidiform mole in, epidemiological study and influence of maternal age and ethnic group, **661**
Acinetobacter spp L-form infection of cemented Charnley total hip replacement (L), **781**
Acute phase response and deep lower limb venous thrombosis (L), **519**
Adenoacanthoma of endometrium and morphological changes induced by human papiliomavirus, **554**
Adenocarcinoma *in situ* of uterine cervix, DNA ploidy in (L), **435**
—— of cervix, *in situ* and invasive, AgNORs in, **657**
—— of jejunum and ileum, primary, clinicopathological review of 25 cases, **533**
—— of salivary duct (L), **608**
Adenoma, colorectal, grading of dysplasia in, observer reproducibility in, comparison between 2 grading systems, **320**
Adenoma-carcinoma sequence in colorectum and sialic acid histochemistry, **527**
—— ——, mucin marker for, detection in human colonic mucosa by monoclonal antibody AM-3, **379**
Adenomatous polyposis, familial, upper gastrointestinal pathology in, prospective study of 102 patients, **738**
Adenomyosis in Pakistani women, 4-year experience at Aga Khan University Medical Centre, Karachi, **817**
Adenoviruses in stool specimens, ELISA for detection of, comparison with electron microscopy and isolation, **514**
Adrenocorticotrophic hormone test, 1-hour, in diagnosis of attenuated 21-hydroxylase deficiency, assessment of, **493**
Aerobic bacteria, Gram negative, Cathra system for identification of, evaluation of, **587**
AgNOR counts in intraendometrial neoplasia (L), **518**
—— staining in normal bone marrow cells, **723**
AgNORs as new prognostic variable in breast carcinomas, **390**
——, improved silver staining in paraffin wax sections using inverted incubation technique, **1029**
—— in adenocarcinoma *in situ* and invasive adenocarcinoma of cervix, **657**
—— in kidney tumours and xanthogranulomatous pyelonephritis, **147**
——, role in differentiation of malignant and benign tumours of colon, **235**
AIDS and Pneumocystis pneumonia, soluble *Pneumocystis carinii* antigens in bronchoalveolar lavage in, detection by immunoblotting, **584**
——, benign lymphoepithelial lesion of salivary gland in patient with (L), **780**
Alanine aminotransferase in serum, reference ranges estimated from blood donors, **929**
Albumin excretion, increase in diabetes, **3**
——, human, colorimetric determination of (L), **610**
Alcian blue as reliable rapid method for marking resection margins (L), **608**
Alkaline phosphatase, intestinal, in serum, familial increase associated with Gilbert's syndrome, **125**
Alveolar macrophage, monocyte, and neutrophil cell profiles, changes after smoke inhalation injury, **43**
Anaemia, aplastic, associated with organochlorine pesticide, 3 cases, **98**
——, megaloblastic, DNA methylation in, **211**
Anaerobes, cultivation of, comparison of solid media for, **253**
Anal squamous cell carcinomas over 40 years, detection of HPV DNA by DNA hybridisation in, **133**
Aneurysm, traumatic, of left common carotid artery, case of (L), **1038**
Antibodies, effect on endocarditis strains of streptococci, multiple breakpoint method for measurement of, **774**
Antibodies, IgG, to rubella virus, latex enzyme immunoassay for measurement of, **766**
—— in diagnosis of lymphomas, computer assisted selection and assessment of, **840**
—— to *Legionella pneumophila* (serogroup 1), latex agglutination technique for detection of, **860**
Antibody, chlamydial, prevalence in Malaysians, **400**
——, 3-fucosyl N-acetyllactosamine, staining for, in histological assessment of cervical intraepthelial neoplasia, evaluation of (L), **261**
——, HIV, antigenaemia in asymptomatic homosexual men positive for, Abbott and Dupont HIV antigen ELISA tests for, **420**
——, IgM, to HBc, assays of, and diagnosis of acute hepatitis B (L), **782**
——, monoclonal. *See* Monoclonal antibody
—— response in serum, antigen specific, to *Chlamydia trachomatis* in patients with acute pelvic inflammatory disease, **758**
—— —— of fibrocystic patients to homologous O-typable and O-defective isolates of *Pseudomonas aeruginosa*, **567**
—— to cytomegalovirus, patients undergoing heart transplantation negative for, management of, **373**
—— to *Entamoeba histolytica* and *Giardia lamblia* in serum in non-endemic areas, ELISAs for, non-specific reactions in, **950**
—— to hepatitis C virus in multiply transfused patients with thalassaemia major, **638**
—— to *Mycoplasma pneumoniae*, Serodia Myco II particle agglutination test for, evaluation and comparison with μ-capture ELISA and indirect immunofluorescence, **163**
Antibody-coated bacteria in urine of patients with recent spinal injury, **953**
Anticoagulation, oral, guidelines, 177; *Erratum*, **440**
Antigen, common acute lymphoblastic leukaemia. *See* CD10
——, epithelial membrane, expression by carcinoid tumours (L), **696**
——, K1, of *Escherichia coli*, detection of, simple technique, **76**
——, urinary, ELISA for, in diagnosis of *Legionella pneumophila* serogroup 1 infection, evaluation of, **685**
——, vascular endothelium associated, detection by monoclonal antibody (JC70) on routine tissue sections, **752**
Antigenaemia in asymptomatic HIV antibody positive homosexual men, Abbott and Dupont HIV antigen ELISA tests for, **420**
Antigens, cytoplasmic, antibodies to, neutrophil slides for examination of, simplified method of preparation (L), **83**
——, lymphocyte function associated, and intercellular adhesion molecule-1, cellular expression in normal tissue, **893**
——, *Pneumocystis carinii*, soluble, in bronchoalveolar lavage in Pneumocystis pneumonia and AIDS, detection by immunoblotting, **584**
——, tumour associated, and DNA in solid tumours, tissue preparation for simultaneous flow cytometric quantitation of, **833**
Antral *Helicobacter pylori* in chronic renal failure patients, **397**
Aortitis, thoracic, due to salmonella, case of (L), **877**
Apoptotic cell death during renal transplant rejection (L), **437**
Arcanobacterium haemolyticum, isolation of, selective medium for (L), **610**
Argyrophilic nucleolar organiser region(s). *See* AgNOR(s)
Arthritis, granulomatous, severe, due to spinous injury by "sea mouse" annelid worm, case of, **291**
Aspergillosis, cerebral, in liver transplantation, **114**
——, pulmonary, in patients with leukaemia (L), **783**
Aspirates, fine needle, from benign breast lesions, ultrastructural analysis of, **22**
——, —— ——, of breast, computer-assisted diagnosis of, **168**
Aspiration biopsy, fine needle, secondary tumour deposits in needle tracks in, underestimated risk? (L), **83**
——, fine needle, for Ki-67 staining compared with cryostat sections in assessment of proliferation in non-Hodgkin's lymphoma, **325**
Asucrasia, congenital, intestinal disaccharidases in, combined assessment by differential urinary disaccharide excretion, **406**
Authors, instructions to, **710**
Automated immunochemistry, **591**
Automation and prothrombine time, UK field study of 2 widely used coagulometers, **679**

B cell lymphoma, monoclonality detected in paraffin wax embedded sections using polymerase chain reaction in, **888**
—— —— ——, monocytoid, clinical and prognostic features of 21 patients, **619**
—— —— populations, clonal and polyclonal, differentiation in surgical biopsy specimens, rapid method for, **429**
Bacteria, aerobic, Gram negative, Cathra system for identification of, evaluation of, **587**
—— and fungi commonly found in urine, bacteriostatic and bactericidal actions of boric acid against, **484**
——, antibody-coated, in urine of patients with recent spinal injury, **953**
——, spiral-shaped, in gastric mucosa (L), **173**
Bacterial overgrowth, small intestinal, in chronic lymphocytic leukaemia, **57**
—— pathogens, examination of faeces for (*ACP Broadsheet*, 124), **410**
Bacteriological diagnosis of diphtheria (*ACP Broadsheet*, 125), **576**
Basement membranes, thin, in minimally abnormal glomeruli, **32**
Beef sausages, histomorphometry and immunohistochemistry of, and bovine spongioform encephalopathy (L), **435**
Behçet's disease, complete, serum IgE concentrations in (L), **262**
Benzidine for histological demonstration of haemoglobin in human bite marks, **600**
Bile acids, conjugated, in gastric juice, analysis of, new technique, **924**
Biliary canaliculi, localisation of CD10 by immunoelectron microscopical examination to, **654**
Biochemical ligand binding assay and immunohistochemical techniques in assessment of oestrogen receptor content of breast carcinoma, **46**
Biotin and digoxigenin labelled DNA probes, sensitivity for detection of human papillomavirus by *in situ* hybridisation, **800**
Birefringence measurements, quantitative, on endomyocardial biopsy

specimens and cytoimmunological monitoring on blood cells for diagnosis of rejection after heart transplantation, **137**
Bite marks, human, haemoglobin in, histological demonstration with benzidine, **600**
Bladder, carcinoma of, transitional cell, and epithelial dysplasia in, observer variability in histopathological reporting of, **17**
——, urinary, and prostate, paraganglial cells of, diagnostic problem with, **13**
——, ——, carcinoma of, transitional cell, CD15 antigen expression in, **541**
Bleeding tendency and fibrinolysis in hepatosplenic schistosomiasis, **476**
Blood donors, serum alanine aminotransferase reference ranges estimated from, **929**
——, peripheral, and bone marrow in polycythaemia, erythroid colony growth from, **937**
—— platelet. *See* Platelet
—— sample volume, effect on yield of positive blood cultures from adults with haematological malignancy, **777**
—— samples from skin puncture in factor VIII inhibitor assay, **433**
—— transfusion, liver disease transmitted by, and hepatitis C virus (*Review*), **445**
——transfusions, multiple, antibody to hepatitis C virus in thalassaemia major patients after, **638**
Bone biopsy specimens, undecalcified, identification of cutting artefacts in sections of, technique for, 516; *Erratum*, **880**
—— marrow and peripheral blood in polycythaemia, erythroid colony growth from, **937**
—— —— biopsy in monoclonal gammopathies, correlations between pathological findings and clinical data, **469**
—— —— —— specimens, bilateral, in non-Hodgkin's lymphoma, value of, **630**
—— ——, CD10, TdT, and cytoplasmic μ lymphocyte positivity in, with transient erythroblastopenia of childhood, **857**
—— —— cells, normal, AgNOR staining in, **723**
—— —— in disseminated neuroblastoma, immunocytochemical examination, **9**
—— —— stromal cell changes in haematological malignancies, **942**
—— —— transplant recipients, virus infections in, 3-year prospective study, **633**
—— —— transplantation, allogeneic, early reconstitution of haematopoiesis after, prospective histopathological study, **365**
—— —— trephine biopsy specimens, immunohistochemical detection of neuroblastoma in frozen sections of, **334**

Year Book of Pathology and Clinical Pathology, 1989, 1989, **699**
Books: new titles, **439, 966**
Boric acid, bacteriostatic and bactericidal actions against bacteria and fungi commonly found in urine, **484**
Bovine spongioform encephalopathy and histomorphometry and immunohistochemistry of beef sausages (L), **435**
Bowel. See Intestine(s)
Brain lymphoma, primary, demonstration of Epstein-Barr virus by *in situ* DNA hybridisation in, **220**
Breast, carcinoma of, cytological specimens, prognostic value of nucleolar morphometric variables in, **157**
——, —— ——, epidermal growth factor receptor expression in, **385**
——, —— ——, nucleolar organiser regions as new prognostic variable in, **390**
——, —— ——, oestrogen receptor content, assessment by immunohistochemical techniques and biochemical ligand binding assay, **46**
——, —— ——, —— receptors in cases biochemically receptor negative, immunohistological study, **239**
——, —— ——, progesterone receptors in paraffin wax sections of, demonstration of, **671**
——, epithelial hyperplasia of, spherical connective tissue inclusions in ("collagenous spherulosis"), **905**
——, fine needle aspirate of, computer-assisted diagnosis of, **168**
—— lesions, benign, fine needle aspirates from, ultrastructural analysis of, **22**
—— ——, ——, monoclonal antibody B72.3 in, **1026**
—— ——, screened, excision planes in, differential marking by organically coloured gelatins, **604**
—— tissue, radiation and other pathological changes after conservation treatment for carcinoma, **152**
Bronchoalveolar lavage in Pneumocystis pneumonia and AIDS, soluble *Pneumocystis carinii* antigens in, detection by immunoblotting, **584**
—— mononuclear cells in pulmonary sarcoidosis, enhancement of c-sis proto-oncogene transcriptions in, **295**

Calcium overload in human giant cell myocarditis, **650**
Campylobacter isolates, lectin typing of, **957**
—— *pylori*. *See Helicobacter pylori*
—— spp, culturing, implications of delay (L), **962**
Campylobacter-like organisms in heterotopic gastric mucosa of upper oesophagus (L), **961**
Candida albicans mediastinitis, rapid diagnosis by coagglutination (L), **696**
Candidiasis, true cause of vulvovaginal irritation in women with diabetes mellitus?, **644**
Carcinoid tumours, epithelial membrane antigen expression in (L), **696**
Carcinoma, anal, squamous cell, detection of HPV DNA by DNA hybridisation in specimens over 40 years, **133**
——, cervical, squamous cell, demonstration of multiple HPV types using polymerase chain reaction on paraffin wax embedded material in, **52**
——, colorectal, human, type II oestrogen binding sites in, **1004**
——, ——, oestrogen receptors in, **149**
——, oesophageal, squamous cell, human papillomavirus in, **909**
—— of breast, cytological specimens, prognostic value of nucleolar morphometric variables in, **157**
—— —— ——, epidermal growth factor receptor expression in, **385**
—— —— ——, nucleolar organiser regions as new prognostic variable in, **390**
—— —— ——, oestrogen receptor content, assessment by immunohistochemical techniques and biochemical ligand binding assay, **46**
—— —— ——, —— receptors in cases biochemically receptor negative, immunohistological study, **239**
—— —— ——, progesterone receptors in paraffin wax sections of, demonstration of, **671**
—— of lung, DNA analysis in, importance of sampling method in, **820**
—— of palatine tonsil, detection of human papillomavirus type 16 DNA in, **918**
—— of stomach, signet-ring cell, intraepithelial stage of (L), **695**
—— of urinary bladder, transitional cell, CD15 antigen expression in, **541**
—— ovarian, parathyroid hormone related peptide in (L), **784**
——, pancreatic, epithelial markers (DD9, CEA, EMA and CAM 5·2) in, immunoperoxidase localisation of, **448**
——, radiation and other pathological changes in breast tissue after conservation treatment for, **152**
——, transitional cell, and epithelial dysplasia in bladders, observer variability in histopathological reporting of, **17**
Carotid artery, common, left, traumatic aneurysm of, case of (L), **1038**
—— glomitis, chronic, and glomus pulmonale, **39**
Cathra system for identification of Gram negative aerobic bacteria, evaluation of, **587**
CD10, localisation to biliary canaliculi by immunoelectron microscopical examination, **654**
CD15 antigen expression in urinary bladder transitional cell carcinoma, **541**
Cell proliferation assessment in histological material (*Review*), **184**
Cerebral aspergillosis in liver transplantation, **114**
—— lymphomas, review of 70 cases, **544**
Cervical flat koilocytic lesions and intraepithelial neoplasia, immunoreactive α interferon in, **230**
—— intraepithelial neoplasia, 3-fucosyl N-acetyllactosamine antibody staining in histological assessment of, evaluation of (L), **261**
—— smears, cellular composition of, determination of, cytobrush contribution to, **393**
Cervix, adenocarcinoma of, *in situ* and invasive, AgNORs in, **657**
—— and ovary, postoperative necrotising granulomata in (L), **1037**
——, normal, and cervical squamous cell carcinoma, demonstration of multiple HPV types using polymerase chain reaction on paraffin wax embedded material in, **52**
——, uterine, adenocarcinoma *in situ* of, DNA ploidy in (L), **435**
Chemical pathology across Europe, **881**
Chlamydia psittaci and TWAR (*C pneumoniae*), rapid identification in sputum samples using amplified enzyme immunoassay (L), **260**
——*trachomatis*, antigen specific serum antibody response to, in patients with acute pelvic inflammatory disease, **758**
Chlamydial antibody, prevalence in Malaysians, **400**
1-α-Cholecalciferol in hypomagnesaemia induced by cyclosporin, potential benefit of (L), **783**
Cholesterol absorption by gall bladder, **572**
Chromosome 11 allele loss in sporadic insulinoma, **377**
Clinical pathologists, early. *See* Hodgkin, Thomas
Coagglutination in rapid diagnosis of *Candida albicans* mediastinitis (L), **696**
Coagulase testing for routine identification of *Staphylococcus aureus*, comparison with commercial kits, **246**
Coagulometers and prothrombin time, UK field study of 2 widely used systems, **679**
Coeliac disease and lymphocytic gastritis (L), **436**
—— ——, brush border enzymes in, histochemical evaluation, **307**
Colitis, ulcerative, bactericidal competence of serum from patients with, and serum bactericidal resistance of faecal *E coli*, **316**
——, ——, giant inflammatory polyposis in, case presenting with protein losing enteropathy (L), **346**
——, ——, lamina propria eosinophils and mast cells in, comparison between Asians and Caucasians, **27**
"Collagenous spherulosis", **905**
Colon, tumours of, malignant and benign, differentiation of, role of nucleolar organiser regions in, **235**
Colonic mucosa, human, mucin marker for adenoma-carcinoma sequence in, detection by monoclonal antibody AM-3, **379**
—— ——, normal and neoplastic, pancreatic secretory trypsin inhibitor in, immunohistochemical demonstration of, **901**
—— —— of subjects with polyps, abnormal cell proliferation in, immunohistochemical detection of, **744**

—— ——, proliferation rate in normal subjects and patients with colonic neoplasms, immunohistochemical study, **453**
Colorectal adenoma, grading of dysplasia in, observer reproducibility in, comparison between 2 grading systems, **320**
—— cancer, human, type II oestrogen binding sites in, **1004**
—— ——, oestrogen receptors in, **149**
Colorectum, adenoma-carcinoma sequence in, and sialic acid histochemistry, **527**
Colorimetric determination of human albumin (L), **610**
Common acute lymphoblastic leukaemia antigen. *See* CD10
Computer-assisted diagnosis of fine needle aspirate of breast, **168**
—— selection and assessment of antibodies in diagnosis of lymphomas, **840**
Connective tissue inclusions, spherical, in epithelial hyperplasia of breast ("collagenous spherulosis"), **905**
Corrections, **440**, **880**
Crypt cell proliferation and HLA-DR expression in pelvic ileal pouches, **824**
C-sis proto-oncogene transcription enhancement in bronchoalveolar mononuclear cells in pulmonary sarcoidosis, **295**
Cyclosporin, hypomagnesaemia induced by, potential benefit of 1-α-cholecalciferol in (L), **783**
Cystic fibrosis, antibody response to homologous O-typable and O-defective isolates of *Pseudomonas aeruginosa* in patients with, **567**
—— ——, ileal mucus in, abnormal fucosylation of, histochemical demonstration using peroxidase labelled lectins, **1014**
—— ——, —— —— ——, —— —— ——, histochemical study using monoclonal antibodies to fucosyl oligosaccharides, **1019**
Cysts, ovarian, fluid from, prorenin in (L), **784**
Cytobrush, contribution to determination of cellular composition of cervical smears, **393**
Cytoimmunological monitoring on blood cells and quantitative birefringence measurements on endomyocardial biopsy specimens for diagnosis of rejection after heart transplantation, **137**
Cytology, urinary, comparison of 2 preparatory techniques, **1034**
Cytomegalovirus antibody negative patients undergoing heart transplantation, management of, **373**
Cytophotometric analysis of DNA in lymph node aspirates from patients with non-Hodgkin's lymphoma, prognostic value of, **626**
Cytoplasmic antigens, antibodies to, neutrophil slides for examination of, simplified method of preparation (L), **83**

Diabetes, increased albumin excretion in, **3**
—— mellitus, vulvovaginal irritation in women with, candidiasis true cause of?, **644**
Dialysis, renal, hepatic iron in patients given intravenous iron dextran during, **119**
Digestive. *See* Gastrointestinal
Digoxigenin and biotin labelled DNA probes, sensitivity for detection of human papillomavirus by *in situ* hybridisation, **800**
—— end labelled oligodeoxynucleotide probe in detection of messenger RNA, **424**
—— labelled DNA probes for detection of viral genomes by *in situ* hybridisation, **806**
Diphtheria, bacteriological diagnosis of (*ACP Broadsheet*, 125), **576**
Dipstrip screening of urines, workload and consumable costs reduced by? (L), **875**
Disaccharidase activity, duodenal, relation to normal and abnormal mucosal morphology, **537**
Disaccharidases, intestinal, in congenital asucrasia, combined assessment by differential urinary disaccharide excretion, **406**
DNA analysis of lung cancer, importance of sampling method in, **820**
—— and RNA tissue extraction and analysis by polymerase chain reaction, **499**
—— and tumour associated antigens in solid tumours, tissue preparation for simultaneous flow cytometric quantitation of, **833**
—— degradation in tissues fixed in formaldehyde, mechanism of, fundamental study, **748**
——, flow cytometric analysis in ectopic pregnancy (L), **963**
——, human papillomavirus type 16, detection in carcinomas of palatine tonsil, **918**
—— hybridisation for detection of HPV DNA in anal squamous cell carcinomas over 40 years, **133**
—— —— *in situ* in demonstration of Epstein-Barr virus in primary brain lymphoma, **220**
—— in lymph node aspirates from patients with non-Hodgkin's lymphoma, cytophotometric analysis of, prognostic value of, **626**
—— methylation in megaloblastic anaemia, **211**
—— ploidy in adenocarcinoma *in situ* of uterine cervix (L), **435**
—— —— of smooth muscle tumours, CAS 100 image analysis study in formalin fixed, paraffin wax embedded tissue, **465**
—— probe, biotinylated, hybridisation *in situ* in herpetic lesions using, **416**
—— probes, diagnosis of toxoplasmosis using (L), **260**
—— ——, digoxigenin and biotin labelled, sensitivity for detection of human papillomavirus by *in situ* hybridisation, **800**
—— ——, —— labelled, for detection of viral genomes by *in situ* hybridisation, **806**
—— restriction fragments of *Helicobacter pylori*, signature patterns before and after treatment, **646**
Drugs, cytotoxic, idiopathic portal hypertension associated with, 4 cases, **206**
Duodenum, disaccharidase activity, relation to normal and abnormal mucosal morphology, **537**
——, gastric epithelium in, association with *Helicobacter pylori* and inflammation, **981**
Dyspepsia, *Helicobacter pylori* in patients in Kuwait with, **987**
Dysplasia, grading in colorectal adenomas, observer reproducibility in, comparison between 2 grading systems, **320**

EBM/11 labelling of cells of mononuclear phagocyte system in routine archival biopsy specimens, **992**
Ebola-like virus, detection by immunoelectron microscopy during 1989 US epizootic in cynomolgus monkeys, **813**
Electron and light microscopic demonstration of immune deposits in renal tissue (L), **520**
—— microscopic and immunohistochemical findings in benign fibroepithelial vaginal polyps, **224**
ELISA, amplified, for rapid identification of *Chlamydia psittaci* and TWAR (*C pneumoniae*) in sputum samples (L), **260**
—— antigen preparations alone or in combination for serodiagnosis of *Helicobacter pylori* infections, **511**
—— for detection of adenoviruses in stool specimens, comparison with electron microscopy and isolation, **514**
—— for urinary antigen in diagnosis of *Legionella pneumophila* serogroup 1 infection, evaluation of, **685**
—— test, rapid, for detection of Epstein-Barr virus infection, assessment of, **691**
ELISAs for serum antibody to *Entamoeba histolytica* and *Giardia lamblia* in non-endemic areas, non-specific reactions in, **950**
Embolism, pulmonary, cross-linked fibrin degradation products as predictor of (L), **1039**
Encephalopathy, spongiform, bovine, and histomorphometry and immunohistochemistry of beef sausages (L), **435**
Endocarditis due to *Staphylococcus lugdunensis*, case of (L), **171**
—— strains of streptococci, effect of antibiotics, multiple breakpoint method for measurement of, **774**
Endometrium, adenoacanthoma of, and morphological changes induced by human papillomavirus, **554**
Entamoeba histolytica and *Giardia lamblia*, serum antibody in non-endemic areas to, ELISAs for, non-specific reactions in, **950**
Enteritis, *E coli* 0157:H7, faecal leucocytes in (L), **347**
Enterobacteriaceae, urease activity in, detection with urea filter paper disc using multipoint replication techniques, **771**
Enteropathy, protein-losing, case of giant inflammatory polyposis in ulcerative colitis presenting with (L), **346**
Enzyme-linked immunosorbent assay(s). *See* ELISA(s)
Enzymes, brush border, in coeliac disease, histochemical evaluation, **307**
Eosinophils and mast cells of lamina propria in ulcerative colitis, comparison between Asians and Caucasians, **27**
Epidermal growth factor receptor expression in breast carcinoma, **385**
Epithelia, distinction from mesothelia by new monoclonal antibody (Ber-EP4), **213**
Epithelial dysplasia and transitional cell carcinoma in bladders, observer variability in histopathological reporting of, **17**
—— hyperplasia of breast, spherical connective tissue inclusions in ("collagenous spherulosis"), **905**
—— membrane antigen expression by carcinoid tumours (L), **696**
Epstein-Barr virus demonstration in primary brain lymphoma by *in situ* DNA hybridisation, **220**
—— —— infection, rapid ELISA test for detection of, assessment of, **691**
Erythroblastopenia, transient, of childhood with CD10, TdT, and cytoplasmic μ lymphocyte positivity in bone marrow, **857**
Erythrocyte. *See* Red cell
Erythroid colony growth from peripheral blood and bone marrow in polycythaemia, **937**
Escherichia coli, faecal, serum bactericidal resistance of, and bactericidal competence of serum from patients with ulcerative colitis, **316**
—— —— K1 antigen, detection of, simple technique, **76**
—— —— 0157:H7 enteritis, faecal leucocytes in (L), **347**
Esterase deficiency, monocyte, in malignant neoplasia, **282**; *Erratum*, **880**
Europe, pathology across, differences and similarities, **613**, **701**, **796**, **881**
Exanthema, acute, in 4 patients with HIV infection, histopathology of, **201**

Factor VIII inhibitor assay using skin puncture blood samples, **433**
Faecal *E coli*, serum bactericidal resistance of, and bactericidal competence of serum from patients with ulcerative colitis, **316**
—— leucocytes in *E coli* 0157:H7 enteritis (L), **347**
Faeces, examination for bacterial pathogens (*ACP Broadsheet*, 124), **410**
Fetal haemoglobin, hereditary persistence of, fetal-maternal haemorrhage in mothers with, assessment of, **728**
Fibrin degradation products, cross-linked, as predictor of pulmonary embolism (L), **1039**

Fibrinogen, plasma, in differentiation of hyperlipidaemic patients, comparison of immunochemical assay and turbidimetric thrombin clotting technique, **508**
—— standards (L), **782**
Fibrinolysis and bleeding tendency in hepatosplenic schistosomiasis, **476**
Fibronectin and IgG complexes, high molecular weight, circulating, in myeloproliferative disorders, **102**
——, plasma concentrations in HIV infection, **560**
Fixation, delay in, number of mitotic figures in processed tissue affected by?, **597**
Flow cytometric DNA analysis in ectopic pregnancy (L), **963**
—— —— quantitation, simultaneous, of tumour associated antigens and DNA in solid tumours, tissue preparation for, **833**
—— cytometry for reticulocyte counting, **675**
Folate, red cell, measurement by radioisotopic method, effect of haemolysate preparation, **160**
Formaldehyde, DNA degradation in tissues fixed in, mechanism of, fundamental study, **748**
3-Fucosyl N-acetyllactosamine antibody staining in histological assessment of cervical intraepithelial neoplasia, evaluation of (L), **261**
Fucosylation, abnormal, of ileal mucus in cystic fibrosis, histochemical demonstration using peroxidase labelled lectins, **1014**
——, ——, —— —— —— —— ——, histochemical study using monoclonal antibodies to fucosyl oligosaccharides, **1019**
Fungi and bacteria commonly found in urine, bacteriostatic and bactericidal actions of boric acid against, **484**

Gall bladder, cholesterol absorption by, **572**
Gammopathies, monoclonal, bone marrow biopsy in, correlations between pathological findings and clinical data, **469**
Gastric epithelium in duodenum, association with *Helicobacter pylori* and inflammation, **981**
—— juice, conjugated bile acids in, analysis of, new technique, **924**
—— mucosa, heterotopic, of upper oesophagus, Campylobacter-like organisms in (L), **961**
—— ——, spiral-shaped bacteria in (L), **173**
Gastrin and pepsinogen I, serum concentrations in children positive for *Helicobacter pylori*, **762**
Gastritis, lymphocytic, and coeliac disease (L), **436**
——, reflux, in intact stomach, **303**
Gastrointestinal diseases, oxygen derived free radicals in, **403**
—— pathology, upper, in familial adenomatous polyposis, prospective study of 102 patients, **738**
—— tract, upper and lower, *Campylobacter pylori* distribution in, microbiological and histological study (L), **82**
—— ——, ——, *Campylobacter pylori* in HIV-1 infection in, **60**
Gelatins, coloured, for differential marking of excision planes in screened breast lesions, **604**
Genotypic anaiyses in assessment of clonality of T cell and phenotypically undefined lymphoid neoplasms, value of, **548**
Giant cell myocarditis, human, calcium overload in, **650**
Giardia lamblia and *Entamoeba histolytica*, serum antibody in non-endemic areas to, ELISAs for, non-specific reactions in, **950**
Giardiasis, histological changes in biopsy specimens of 80 patients with, analysis of, **641**
Gilbert's syndrome associated with familial increased serum intestinal alkaline phosphatase, **125**
Glisson's capsule, true lipoma of, case of (L), **780**
Globulin measurements, calculated, useful in screening for paraproteinaemia? (L), **694**
Glomerular filtration rate measurement in homozygous sickle cell disease, comparison of ^{51}Cr-EDTA clearance, creatinine clearance, serum creatinine and β_2 microglobulin, **370**
Glomeruli, minimally abnormal, thin basement membranes in, **32**
Glomitis, chronic, of carotid bodies, and glomus pulmonale, **39**
Gold probes, 1 nm, on paraffin wax sections for *in situ* hybridisation histochemistry, **810**
Gram negative aerobic bacteria, Cathra system for identification of, evaluation of, **587**
Granulomata, necrotising, postoperative, in cervix and ovary (L), **1037**
Granulomatous arthritis, severe, due to spinous injury by "sea mouse" annelid worm, case of, **291**
Granulosa cell differentiation in testicular sex cord stromal tumour and implications of detection of steroid hormone receptors, **732**

Haemagglutination assay for *Treponema pallidum*, evaluation of equivocal test results of, **166**
Haematological malignancies, bone marrow stromal cell changes in, **942**
—— malignancy, effect of sample volume on yield of positive blood cultures from adults with, **777**
Haematology across Europe, differences and similarities, **613**
——, current concerns, **789**, **882**
Haematopoiesis, early reconstitution after allogeneic bone marrow transplantation, prospective histopathological study, **365**
Haematuria, familial, benign. *See* Thin membrane nephropathy
Haemoglobin, fetal, hereditary persistence of, fetal-maternal haemorrhage in mothers with, assessment of, **728**
—— in human bite marks, histological demonstration with benzidine, **600**
Haemolysate preparation, effect on measurement of red cell folate by radioisotopic method, **160**
Haemophilia A carrier state, rapid assessment by non-invasive polymerase chain reaction techniques, **505**
——, extracorporeal protein A immunoabsorption in elective surgery in patient with high titre inhibitors (L), **172**
Haemophilus influenzae identification and biotyping, evaluation of 2 rapid methods, **581**
Haemopoietic response to critical illness, observations, **850**
Haemorrhage, fetal-maternal, in mothers with hereditary persistence of fetal haemoglobin, assessment of, **728**
Heart transplantation, cytomegalovirus antibody negative patients undergoing, management of, **373**
—— ——, rejection after, diagnosis by cytoimmunological monitoring on blood cells and quantitative birefringence measurements on endomyocardial biopsy specimens, **137**
Helicobacter pylori (Review, 1986–89), **353**
—— —— and inflammation, association with gastric epithelium in duodenum, **981**
—— ——, antral, in chronic renal failure patients, **397**
—— —— detection in frozen samples, reproducible test for (L), **519**
—— —— distribution in upper and lower gastrointestinal tract, microbiological and histological study (L), **82**
—— ——, DNA restriction fragments, signature patterns before and after treatment, **646**
—— ——, immunocytochemical detection in formalin fixed tissue biopsy specimens (L), **518**
—— —— in dyspeptic patients in Kuwait, **987**
—— —— in upper gastrointestinal tract in HIV-1 infection, **60**
—— —— infections, serodiagnosis of, ELISA antigen preparations alone or in combination for, **511**
—— ——, lack of *in vitro* activity of omeprazole against (L), **171**; *Erratum*, **440**
—— ——, serum pepsinogen I and gastrin concentrations in children positive for, **762**
—— ——, superior stain using toluidine O for (L), **961**
—— ——, survival in water and saline (L), **609**
Hepatic vascular leiomyosarcoma, primary, of probable portal vein origin, case of (L), **1036**
Hepatitis B, acute, diagnosis of, and anti-HBc IgM assays (L), **782**
—— —— virus in HIV infection, histological and immunohistochemical study, **203**
—— C virus and transfusion transmitted liver disease (*Review*), **445**
—— —— ——, antibody to, in multiply transfused patients with thalassaemia major, **638**
Hepatosplenic schistosomiasis, fibrinolysis and bleeding tendency in, **476**
Herpetic lesions, hybridisation *in situ* using biotinylated DNA probe in, **416**
Hip replacement, total, Charnley, cemented, Acinetobacter spp L-form infection of (L), **781**
Histopathological reporting of transitional cell carcinoma and epithelial dysplasia in bladders, observer variability in, **17**
Histopathology across Europe, differences and similarities, **796**
HIV antibody positive homosexual men, asymptomatic, antigenaemia in, Abbott and Dupont HIV antigen ELISA tests for, **420**
—— infection, acute exanthema in 4 patients with, histopathology of, **201**
—— ——, hepatitis B virus in, histological and immunohistochemical study, **203**
—— ——, lymph node aspirates in patients with, immunocytochemical analysis of, **844**
—— ——, plasma fibronectin concentrations in, **560**
HIV-1 infection, *Campylobacter pylori* in upper gastrointestinal tract in, **60**
HLA-DR expression and crypt cell proliferation in pelvic ileal pouches, **824**
Hodgkin, Thomas (1798–1866), pathologist, physician, and philanthropist, **616**
Human immunodeficiency virus. *See* HIV
Hybridisation, DNA, for detection of HPV DNA in anal squamous cell carcinomas over 40 years, **133**
——, ——, *in situ* in demonstration of Epstein-Barr virus in primary brain lymphoma, **220**
—— *in situ*, biotinylated, and immunocytochemistry for detection of measles virus in central nervous system tissue, **329**
—— —— —— comparative study of juvenile laryngeal papillomatosis in Papua New Guinea and Australia, **1023**
—— —— —— histochemistry, 1 nm gold probes on paraffin wax sections for, **810**
—— —— —— in detection of human papillomavirus, sensitivity of digoxigenin and biotin labelled DNA probes for, **800**
—— —— —— in herpetic lesions using biotinylated DNA probe, **416**
—— —— ——, non-isotopic, combined with immunohistochemistry for identification of cell type infected by human parvovirus and demonstration of cytomegalovirus DNA and antigen in renal infection, **129**
—— —— ——, Vira Type, in detection and typing of human papillomavirus, comparison with dot blot technique, **913**
—— —— —— with digoxigenin-labelled DNA probes for detection of

viral genomes, **806**
Hydatidiform mole, complete and partial, epidemiological study in Abu Dhabi, influence of maternal age and ethnic group, **661**
21-Hydroxylase deficiency, attenuated, diagnosis of, assessment of 1-hour adrenocorticotrophic hormone test in, **493**
Hypercalcaemia and osteolytic lesions associated with chronic lymphatic leukaemia, 2 cases (L), **877**
Hyperlipidaemic patients, differentiation by plasma fibrinogen, comparison of immunochemical assay and turbidimetric thrombin clotting technique, **508**
Hypertension, portal, idiopathic, associated with cytotoxic drugs, 4 cases, **206**
Hypomagnesaemia induced by cyclosporin, potential benefit of 1-α-cholecalciferol in (L), **783**

Ileal mucus in cystic fibrosis, abnormal fucosylation of, histochemical demonstration using peroxidase labelled lectins, **1014**
—— —— —— —— ——, —— —— ——, histochemical study using monoclonal antibodies to fucosyl oligosaccharides, **1019**
—— pouches, pelvic, crypt cell proliferation and HLA-DR expression in, **824**
Ileum and jejunum, adenocarcinoma of, primary, clinicopathological review of 25 cases, **533**
Illness, critical, haemopoietic response to, observations, **850**
Image analysis (CAS 100) study of ploidy of smooth muscle tumours in formalin fixed, paraffin wax embedded tissue, **465**
Immune deposits in renal tissue, light and electron microscopic demonstration (L), **520**
Immunoalkaline phosphatase technique for paraffin wax embedded tissues in diagnostic renal pathology, **665**
Immunoblot technique for visualisation of serum pepsinogen A isozymogen patterns, **871**
Immunoblotting for detection of soluble *Pneumocystis carinii* antigens in bronchoalveolar lavage in Pneumocystis pneumonia and AIDS, **584**
Immunochemistry, automated, **591**
Immunocytochemical analysis of lymph node aspirates in patients with HIV infection, **844**
—— detection of *Helicobacter pylori* in formalin fixed tissue biopsy specimens (L), **518**
—— examination of bone marrow in disseminated neuroblastoma, **9**
Immunocytochemistry and biotinylated *in situ* hybridisation for detection of measles virus in central nervous system tissue, **329**
Immunoelectron microscopical examination for localisation of CD10 to biliary canaliculi, **654**
—— microscopy detection of Ebola-like virus during 1989 US epizootic in cynomolgus monkeys, **813**
Immunoglobulin E, serum concentrations in complete Behçet's disease (L), **262**
—— G and fibronectin complexes, high molecular weight, circulating, in myeloproliferative disorders, **102**
—— —— antibodies to rubella virus, latex enzyme immunoassay for measurement of, **766**
—— —— avidity, potential role in diagnosis of toxoplasmosis, **1032**
—— M anti-HBc, assays of, and diagnosis of acute hepatitis B (L), **782**
Immunohistochemical and electron microscopic findings in benign fibroepithelial vaginal polyps, **224**
—— demonstration of pancreatic secretory trypsin inhibitor in normal and neoplastic colonic mucosa, **901**
—— detection of abnormal cell proliferation in colonic mucosa of subjects with polyps, **744**
—— —— of neuroblastoma in frozen sections of bone marrow trephine biopsy specimens, **334**
—— studies of intrahepatic tumour necrosis factor α in chronic liver disease, **298**
—— study of proliferation rate of colonic mucosa in normal subjects and patients with colonic neoplasms, **453**
—— techniques and biochemical ligand binding assay in assessment of oestrogen receptor content of breast carcinoma, **46**
Immunohistochemistry combined with non-isotopic *in situ* hybridisation for identification of cell type infected by human parvovirus and demonstration of cytomegalovirus DNA and antigen in renal infection, **129**
Immunohistological study of oestrogen receptors in breast carcinomas biochemically receptor negative, **239**
Immunoperoxidase localisation of epithelial markers (DD9, CEA, EMA and CAM 5·2) in pancreatic carcinoma, **448**
—— study of renal biopsy specimens, technical improvements, **257**
Immunophenotypic differences between osteoclasts and macrophage polykaryons, implications for differentiation and osteoclast ontogeny, **997**
Implantable devices, adherence of *Staphylococcus epidermidis* to, association with production of extra-cellular slime during stationary phase of organism's growth, **866**
Inflammation and *Helicobacter pylori*, association with gastric epithelium in duodenum, **981**
Insulinoma, sporadic, chromosome 11 allele loss in, **377**
Intercellular adhesion molecule-1 and lymphocyte function associated antigens, cellular expression in normal tissue, **893**
α-Interferon, immunoreactive, in cervical flat koilocytic lesions and intraepithelial neoplasia, **230**
—— treatment of Waldenström's macroglobulinaemia (L), **437**
Intestinal alkaline phosphatase in serum, familial increase associated with Gilbert's syndrome, **125**
—— disaccharidases in congenital asucrasia, combined assessment by differential urinary disaccharide excretion, **406**
Intestine, small, bacterial overgrowth in chronic lymphocytic leukaemia, **57**
——, ——, mucosal brush border enzymes in coeliac disease, histochemical evaluation, **307**
Intestines, inflamed, epithelium of, increased laminin/collagen receptor (VLA-1) expression on, **313**
——, inflammatory disease, mucin depletion in, **143**
Intraendometrial neoplasia, AgNOR counts in (L), **518**
Intraepithelial malakoplakia, case of (L), **696**
Iron, hepatic, in dialysed patients given intravenous iron dextran, **119**

Jejunum and ileum, adenocarcinoma of, primary, clinicopathological review of 25 cases, **533**
Journal of Clinical Pathology, change in size and cover style (*Editorial*), **1**
—— —— —— ——, Foreword to Instructions to authors, **700**

K1 antigen of *Escherichia coli*, detection of, simple technique, **76**
Kidney tumours and xanthogranulomatous pyelonephritis, nucleolar organiser regions in, **147**
——. *See also* Renal
Klebsiella spp, rapid identification of (L), **875**
Koilocytic lesions, flat, and intraepithelial neoplasia, of cervix, immunoreactive α interferon in, **230**
Kuwait, *Helicobacter pylori* in dyspeptic patients in, **987**

Laboratory accreditation, Royal College of Pathologists' UK pilot study, **59**
—— costing system based on number and type of test, and Welcan workload measurement system, **92**
—— services, NHS, commercial provision of, private sector viewpoint, **525**

Neuropeptide, cells immunoreactive for, in human thymomas, **829**
Neutrophil bipolar shape formation assay, evaluation and comparison with migration assay, **342**
—— slide preparation for examination of antibodies to cytoplasmic antigens, simplified method (L), **83**
Notices, **88, 176, 264, 352, 440, 524, 612, 700, 788, 879, 968, 1040**
Nucleolar morphometric variables in cytological breast cancer specimens, prognostic value, **157**
—— organiser region(s), argyrophilic. *See* AgNOR(s)
5' Nucleotidase, cytoplasmic, in differentiation of malignant from benign monoclonal gammopathies, **891**

Oesophagus, carcinoma of, squamous cell, human papillomavirus in, **909**
——, melanoma of, malignant, primary (L), **82**
——, upper, heterotopic gastric mucosa of, Campylobacter-like organisms in (L), **961**

Oestrogen binding sites, type II, in human colorectal carcinoma, **1004**
—— receptor content of breast carcinoma, assessment by immunohistochemical techniques and biochemical ligand binding assay, **46**
—— receptors in breast carcinomas biochemically receptor negative, immunohistological study, **239**
—— —— in colorectal carcinoma, **149**
Oligodeoxynucleotide probe end labelled with digoxigenin in detection of messenger RNA, **424**
Omeprazole, lack of *in vitro* activity against *Campylobacter pylori* (L), **171**; *Erratum*, **440**
Organochlorine pesticide, aplastic anaemia associated with, 3 cases, **98**
Osteoclasts and macrophage polykaryons, immunophenotypic differences between, implications for differentiation and osteoclast ontogeny, **997**
Osteolytic lesions and hypercalcaemia associated with chronic lymphatic leukaemia, 2 cases (L), **877**
Ovarian carcinoma, parathyroid hormone related peptide in (L), **784**
—— cyst fluid, prorenin in (L), **784**
—— malignant mixed mesodermal tumours, histogenesis of, **287**
Ovary and cervix, postoperative necrotising granulomata in (L), **1037**
Oxygen derived free radicals in chronic pancreatic and other digestive diseases, **403**

Palatine tonsil, carcinoma of, detection of human papillomavirus type 16 DNA in, **918**
Pancreatic cancer, epithelial markers (DD9, CEA, EMA and CAM 5·2) in, immunoperoxidase localisation of, **448**
—— diseases, chronic, and other digestive diseases, oxygen derived free radicals in, **403**
—— secretory trypsin inhibitor in normal and neoplastic colonic mucosa, immunohistochemical demonstration of, **901**
Papillomatosis, laryngeal, juvenile, in Papua New Guinea and Australia, comparative *in situ* hybridisation study, **1023**
Papillomavirus, human, demonstration of multiple types in normal cervix and in cervical squamous cell carcinoma using polymerase chain reaction on paraffin wax embedded material, **52**
——, ——, detection and typing using Vira Type *in situ* kit, comparison with dot blot technique, **913**
——, ——, —— by *in situ* hybridisation, sensitivity of digoxigenin and biotin labelled DNA probes for, **800**
——, ——, DNA, detection by DNA hybridisation in anal squamous cell carcinomas over 40 years, **133**
——, ——, in oesophageal squamous cell carcinoma, **909**
——, ——, morphological changes induced by, and adenoacanthoma of endometrium. **554**
——, ——, type 16, DNA, detection in carcinomas of palatine tonsil, **918**
——, ——, —— ——, monoclonal antibody (CAMVIR-1) to, production and characterisation using recombinant vaccinia virus, **488**
Papillomaviruses, role of, **269**
Paraganglial cells of urinary bladder and prostate, diagnostic problem with, **13**
Paraproteinaemia, screening for, calculated globulin measurements useful in? (L), **694**
Parathyroid hormone related peptide in ovarian carcinoma (L), **784**
Pathogens, bacterial, examination of faeces for (*ACP Broadsheet*, 124), **410**
Pathologists, clinical, early. *See* Hodgkin, Thomas
Pathology across Europe, differences and similarities, **613**, **701**, **796**, **881**
Peliosis hepatis after liver transplantation, case of, **1036**
Pelvic ileal pouches, crypt cell proliferation and HLA-DR expression in, **824**
—— inflammatory disease, acute, antigen specific serum antibody response to *Chlamydia trachomatis* in, **758**
Pepsinogen A isozymogen patterns in serum, visualisation of, immunoblot technique for, **871**
—— I and gastrin, serum concentrations in children positive for *Helicobacter pylori*, **762**
Petri dishes, 3-compartment, for routine culture of vaginal swabs, comparison with individual plates, **947**
Plasma fibrinogen in differentiation of hyperlipidaemic patients, comparison of immunochemical assay and turbidimetric thrombin clotting technique, **508**
—— fibronectin concentrations in HIV infection, **560**
——, fresh frozen, in successful treatment of case of chronic immune thrombocytopenia (L), **875**
Platelet counter, reference, prototype for, evaluation of, **932**
Pneumocystis carinii antigens, soluble, in bronchoalveolar lavage in Pneumocystis pneumonia and AIDS, detection by immunoblotting, **584**
—— —— trophozoites, importance of, and role in diagnosis of *P. carinii* pneumonia, **265**
Polycythaemia, erythroid colony growth from peripheral blood and bone marrow in, **937**
Polymerase chain reaction analysis and tissue extraction of DNA and RNA, **499**
—— —— —— in detection of monoclonality in paraffin wax embedded sections in B cell lymphoma, **888**
—— —— —— non-invasive techniques in rapid assessment of haemophilia A carrier state, **505**
—— —— —— on paraffin wax embedded material, demonstration of multiple HPV types in normal cervix and in cervical squamous cell carcinoma using, **52**
Polyposis, adenomatous, familial, upper gastrointestinal pathology in, prospective study of 102 patients, **738**
——, inflammatory, giant, in ulcerative colitis, case presenting with protein losing enteropathy (L), **346**
Polyps, abnormal cell proliferation in colonic mucosa of subjects with, immunohistochemical detection of, **744**
——, vaginal, fibroepithelial, benign, immunohistochemical and electron microscopic findings in, **224**
Pontiac fever due to *Legionella micdadei*, outbreak associated with whirlpool spa, microbiological investigations, **479**
Portal hypertension, idiopathic, associated with cytotoxic drugs, 4 cases, **206**
Postmortems. *See* Necropsies
Pregnancy, ectopic, flow cytometric DNA analysis in (L), **963**
Progesterone receptors in paraffin wax sections of breast carcinoma, demonstration of, **671**
Prorenin in ovarian cyst fluid (L), **784**
Prostate and urinary bladder, paraganglial cells of, diagnostic problem with, **13**
Protein A immunoabsorption, extracorporeal, in elective surgery in haemophiliac with high titre inhibitors (L), **172**
Protein-losing enteropathy, case of giant inflammatory polyposis in ulcerative colitis presenting with (L), **346**
Prothrombin time and automation, UK field study of 2 widely used coagulometers, **679**
Pseudomonas aeruginosa, homologous O-typable and O-defective isolates of, antibody response of fibrocystic patients to, **567**
Pulmonary aspergillosis in patients with leukaemia (L), **783**
—— embolism, cross-linked fibrin degradation products as predictor of (L), **1039**
—— sarcoidosis, enhancement of c-sis proto-oncogene transcription in bronchoalveolar mononuclear cells in, **295**
Pyelonephritis, xanthogranulomatous, and kidney tumours, nucleolar organiser regions in, **147**

Radiation and other pathological changes in breast tissue after conservation treatment for carcinoma, **152**
Rate nephelometric determination of rheumatoid factor, comparison between Kallestad QM-300 and Beckman ICS-II (RF) methods, **243**
Red cell folate measurement by radioisotopic method, effect of haemolysate preparation, **160**
Reflux gastritis in intact stomach, **303**
Renal biopsy specimens, immunoperoxidase study of, technical improvements, **257**
—— dialysis, hepatic iron in patients given intravenous iron dextran during, **119**
—— failure, chronic, antral *Helicobacter pylori* in patients with, **397**
—— infection, combined non-isotopic *in situ* hybridisation and immunohistochemistry for identification of cell type infected by human parvovirus and demonstration of cytomegalovirus DNA and antigen in, **129**
—— pathology, diagnostic, immunoalkaline phosphatase technique for paraffin wax embedded tissues in, **665**
—— tissue, immune deposits in, light and electron microscopic demonstration (L), **520**
—— transplant rejection, apoptotic cell death during (L), **437**
Resection margins, alcian blue as reliable rapid method for marking (L), **608**
—— —— in screened breast lesions, differential marking by organically coloured gelatins, **604**
Restriction endonuclease signature patterns of *Helicobacter pylori* DNA before and after treatment, **646**
Reticulocyte counting using flow cytometry, **675**
Retinoblastoma, spontaneous mutation rate in, **496**
Rheumatoid factor, rate nephelometric determination of, comparison between Kallestad QM-300 and Beckman ICS-II (RF) methods, **243**
—— lymphadenopathy, morphological and immunohistochemical study, **106**
RNA and DNA tissue extraction and analysis by polymerase chain reaction, **499**
——, messenger, detection using digoxigenin end labelled oligodeoxynucleotide probe, **424**
Rubella virus, IgG antibodies to, latex enzyme immunoassay for measurement of, **766**

Saline and water, survival of *Helicobater pylori* in (L), **609**
Salivary duct adenocarcinoma (L), **608**
—— gland, lymphoepithelial lesion of, benign, in patient with AIDS (L), **780**
Salmonella, thoracic aortitis due to, case of (L), **877**
Salmonellae, multiple drug resistance in (England and Wales, 1981 and 1988 compared), **563**
Sampling method in DNA analysis of lung cancer, importance of, **820**
Sarcoidosis, pulmonary, enhancement of c-sis proto-oncogene transcription in bronchoalveolar mononuclear cells in, **295**
Schistosomiasis, hepatosplenic, fibrinolysis and bleeding tendency in, **476**
"Sea mouse" annelid worm, severe granulomatous arthritis due to spinous injury by, case of, **291**
Serodia Myco II particle agglutination test for *Mycoplasma pneumoniae* antibody, evaluation and comparison with μ-capture ELISA and indirect immunofluorescence, **163**

Serum alanine aminotransferase reference ranges estimated from blood donors, **929**
—— antibody response, antigen specific, to *Chlamydia trachomatis* in patients with acute pelvic inflammatory disease, **758**
—— —— to *Entamoeba histolytica* and *Giardia lamblia* in non-endemic areas, ELISAs for, non-specific reactions in, **950**
—— bactericidal resistance of faecal *E coli* and bactericidal competence of serum from patients with ulcerative colitis, **316**
—— IgE concentrations in complete Behçet's disease (L), **262**
—— intestinal alkaline phosphatase, familial increase associated with Gilbert's syndrome, **125**
—— pepsinogen A isozymogen patterns, visualisation of, immunoblot technique for, **871**
—— —— I and gastrin concentrations in children positive for *Helicobacter pylori*, **762**
Sialic acid histochemistry and adenoma-carcinoma sequence in colorectum, **527**
Sickle cell disease, homozygous, glomerular filtration rate measurement in, comparison of ^{51}Cr-EDTA clearance, creatinine clearance, serum creatinine and β_2 microglobulin, **370**
—— —— ——, painful crisis of, 'steal' syndrome hypothesis, **789**
Signet-ring carcinoma of stomach, intraepithelial stage of (L), **695**
Silver staining, improved, of nucleolar organiser regions in paraffin wax sections using inverted incubation technique, **1029**
Skin lesions of leprosy, mast cells in, **196**
—— puncture blood samples in factor VIII inhibitor assay, **433**
Smoke inhalation injury, changes in alveolar macrophage, monocyte, and neutrophil cell profiles after, **43**
Smooth muscle tumours, ploidy of, CAS 100 image analysis study in formalin fixed, paraffin wax embedded tissue, **465**
Specimen transport audit (1986–89), **712**
Specimens of larynx, examination of (*ACP Broadsheet*, 126), **792**
"Spherulosis, collagenous", **905**
Spinal injury, recent, antibody-coated bacteria in urine of patients with, **953**
Spleen, preferential localisation of γδ T cell receptors to red pulp of, **461**
Splenic lymphoma, tartrate resistant acid phosphatase positive, 4 cases forming distinct subgroup, **714**
Sputum samples, *Chlamydia psittaci* and TWAR (*C pneumoniae*) in, rapid identification using amplified enzyme immunoassay (L), **260**
Squamous cell carcinoma, cervical, demonstration of multiple HPV types using polymerase chain reaction on paraffin wax embedded material in, **52**
—— —— —— of oesophagus, human papillomavirus in, **909**
—— —— carcinomas, anal, over 40 years, detection of HPV DNA by DNA hybridisation in, **133**
Staphylococcus epidermidis, production of extra-cellular slime during stationary phase of growth and association with adherence to implantable devices, **866**
—— *lugdenensis*, endocarditis due to, case of (L), **171**
Stomach, carcinoma of, signet-ring cell, intraepithelial stage of (L), **695**
——, intact, reflux gastritis in, **303**
Stool specimens, adenoviruses in, ELISA for detection of, comparison with electron microscopy and isolation, **514**
Staphylococcus aureus, routine identification of, coagulase testing compared with commercial kits for, **246**
Streptococci, endocarditis strains of, effect of antibiotics, multiple breakpoint method for measurement of, **774**
Stromal cell changes in bone marrow in haematological malignancies, **942**
—— tumour of testicular sex cord with granulosa cell differentiation and implications of detection of steroid hormone receptors, **732**
Surgical resection margins, Tipp-ex fluid as marker for (L), **346**

T cell and phenotypically undefined lymphoid neoplasms, clonality of, value of genotypic analyses, **548**
—— —— γδ receptors, preferential localisation to red pulp of spleen, **461**
—— —— non-Hodgkin's lymphoma with uveitis, pancreatitis, digital gangrene and multiple chromosomal abnormalities, case of (L), **694**
Tartrate resistant acid phosphatase positive splenic lymphoma, 4 cases forming distinct subgroup, **714**
Testicular sex cord stromal tumour with granulosa cell differentiation and implications of detection of steroid hormone receptors, **732**
Thalassaemia major, antibody to hepatitis C virus in multiply transfused patients with, **638**
Thin membrane nephropathy, incidence of, morphometric investigation of population sample, **457**
Thoracic aortitis due to salmonella, case of (L), **877**
Thrombocytopenia, immune, chronic, successful treatment using fresh frozen plasma of case of (L), **875**
Thrombocytopenic purpura, thrombotic, complicating leptospirosis, case with undescribed association of (L), **961**
Thrombophilia investigation and management, guidelines on, **703**
Thrombosis, venous, deep, of lower limb, and acute phase response (L), **519**
Thymomas, human, cells immunoreactive for neuropeptide in, **829**
Tipp-ex fluid as marker for surgical resection margins (L), **346**
Tissue preparation for simultaneous flow cytometric quantitation of tumour associated antigens and DNA in solid tumours, **833**
Toluidine O, superior stain for *Helicobacter pylori* using (L), **961**
Tonsil, palatine, carcinoma of, detection of human papillomavirus type 16 DNA in, **918**
Toxoplasma gondii and viral infections in children after liver transplantation, **63**
Toxoplasmosis, diagnosis of, potential role of IgG avidity in, **1032**
——, —— ——, using DNA probes (L), **260**
Transitional cell carcinoma and epithelial dysplasia in bladders, observer variability in histopathological reporting of, **17**
—— —— —— of urinary bladder, CD15 antigen expression in, **541**
Transplant, renal, rejection of, apoptotic cell death during (L), **437**
Transplantation, bone marrow, allogeneic, early reconstitution of haematopoiesis after, prospective histopathological study, **365**
——, heart cytomegalovirus antibody negative patients undergoing, management of, **373**
——, ——, rejection after, diagnosis by cytoimmunological monitoring on blood cells and quantitative birefringence measurements on endomyocardial biopsy specimens, **137**
—— of liver, cerebral aspergillosis in, **114**
—— —— ——, peliosis hepatis after, case of (L), **1036**
—— —— ——, viral and *Toxoplasma gondii* infections in children after, **63**
Transplants, bone marrow, virus infections in recipients of, 3-year prospective study, **633**
Traumatic aneurysm of left common carotid artery, case of (L), **1038**
Treponema pallidum haemagglutination assay, evaluation of equivocal test results of, **166**
Tumour deposits, secondary, in needle biopsy tracks, underestimated risk? (L), **83**
—— necrosis factor α, intrahepatic, in chronic liver disease, immunohistochemical studies, **298**
——, stromal, of testicular sex cord with granulosa cell differentiation and implications of detection of steroid hormone receptors, **732**
Tumours, carcinoid, epithelial membrane antigen expression in (L), **696**
—— of colon, malignant and benign, differentiation of, role of nucleolar organiser regions in, **235**
—— of kidney and xanthogranulomatous pyelonephritis, nucleolar organiser regions in, **147**
——, ovarian, mesodermal, mixed, malignant, histogenesis of, **287**
——, smooth muscle, ploidy of, CAS 100 image analysis study in formalin fixed, paraffin wax embedded tissue, **465**
——, solid, tumour associated antigens and DNA in, tissue preparation for simultaneous flow cytometric quantitation of, **833**
Twins, identical, congenital malaria in one of (L), **609**
Typhoid fever, diagnosis of, comparison of methods, **863**

Urease activity in Enterobacteriaceae, detection with urea filter paper disc using multipoint replication techniques, **771**
Urinary antigen ELISA for diagnosis of *Legionella pneumophila* serogroup 1 infection, evaluation of, **685**
Urine, bacteria and fungi commonly found in, bacteriostatic and bactericidal actions of boric acid against, **484**
—— cytology, comparison of 2 preparatory techniques, **1034**
—— of patients with recent spinal injury, antibody-coated bacteria in, **953**
—— screening with dipstrips, workload and consumable costs reduced by? (L), **875**

Vaccinia virus, recombinant, production and characterisation of monoclonal antibody (CAMVIR-1) to human papillomavirus type 16 using, **488**
Vaginal polyps, fibroepithelial, benign, immunohistochemical and electron microscopic findings in, **224**
—— swabs, routine culture of, comparison of 3-compartment Petri dishes and individual plates for, **947**
Vascular endothelium associated antigen, detection by monoclonal antigen (JC70) on routine tissue sections, **752**
—— leiomyosarcoma, hepatic, primary, of probable portal vein origin, case of (L), **1036**
Vira Type *in situ* kit in detection and typing of human papillomavirus, comparison with dot blot technique, **913**
Viral and *Toxoplasma gondii* infections in children after liver transplantation, **63**
—— genomes, detection by *in situ* hybridisation with digoxigenin-labelled DNA probes, **806**
Virus infections in bone marrow transplant recipients, 3-year prospective study, **633**
VLA-1, increased expression on epithelium of inflamed intestine, **313**
Vulvovaginal irritation in women with diabetes mellitus, candidiasis true cause of?, **644**

Waldenström's macroglobulinaemia, α interferon treatment of (L), **437**
Water and saline, survival of *Helicobacter pylori* in (L), **609**
Welcan workload measurement system, and laboratory costing system based on number and type of test, **92**
Whirlpool spa, outbreak of Pontiac fever due to *Legionella micdadei* associated with, microbiological investigations, **479**

Xanthogranulomatous pyelonephritis and kidney tumours, nucleolar organiser regions in, **147**
